

# Trusted. Effective. Ready-to-use.

**BASF**  
We create chemistry

Termidor® Foam termiticide/insecticide provides superior application flexibility indoors and out, on and off structure, with no mixing required. Powered by the same active ingredient as Termidor termiticide/insecticide, the most trusted termiticide in America, it's a highly stable and easy-to-use formulation with proven efficacy for treating above-ground termites and carpenter ants. Termidor Foam termiticide/insecticide is a targeted spot treatment option that, when paired with Trelona® ATBS Annual Bait Stations, delivers fast control and colony elimination of above-ground termites, plus reduced callbacks and labor costs.

## Termidor® Foam

Termiticide/Insecticide

### Convenient & flexible with multiple use sites:

- |                       |   |                    |
|-----------------------|---|--------------------|
| 01   Attics           | 05   Siding                             | 09   Hollow blocks |
| 02   Bridges          | 06   Bath traps & plumbing penetrations | 10   Decks         |
| 03   Trees and shrubs | 07   Between wood & foundations         | 11   Fencing       |
| 04   Crawl spaces     | 08   Wall voids                         |                    |

Trelona ATBS  
Annual Bait Stations

Termidor Foam is an effective and easy option that PMPs can use to quickly control any above ground termite activity. Contact your rep to learn what treatments are right for you.

Always read and follow label directions.  
Termidor and Trelona are registered products of BASF.
